

ANIKET PITHADIA

Ahmedabad, Gujarat | +91 7043907901 | aniketpithadia@gmail.com

PROFESSIONAL SUMMARY

I would describe myself as a creative and task-driven individual with a keen interest in the development of software and web apps. Loves to experiment and learn new technologies and frameworks and is always open to different tech stacks. Team player with an eye for detail and loves the process of building something from scratch.

CORE COMPETENCIES

- HTML5, CSS3
- Javascript
- Bootstrap and Tailwind
- React js and Node js
- Firebase , MonogDB
- Git and Github
- Interpersonal and Communication Skills
- Time management and Active learning

PERSONAL PROJECTS

Youtube Clone

- Built using MERN stack where data is fetching from self-made API.
- An individual can sign in using google, post a video, like, dislike, and comment on it.
- Search for a video based on tags, and subscribe/unsubscribe to a channel.

Animegram

- A Social media app built with MERN stack.
- Has functionality of Signup, log in, Posting a post, ability to like and dislike posts , make comments.
- View individual profile with number of posts made along with ability to follow and unfollow other people.

Fitness Website

- Built a website using react js where the user is shown exercises to target the chosen muscles and also recommends videos and other excercises accordingly by fetching the data from an API.
